

Introducing FORS FMS

Having a purpose-built fleet management system that you can rely on is essential and will save you time, money and enhance all of your fleet administration tasks. FORS FMS will not only support you with all aspects of fleet management, but the bespoke tools incorporated within the system for FORS members will make the journey towards maintaining FORS as well as journey towards FORS accreditation straightforward and easier.

Easy to use

- Set up is easy and straightforward, you'll be up and running in no time
- An automatic DVLA feed means all your vehicle data along with your MOT and tax is present and correct
- Ready to use FORS reports and tools to assist you in all areas of your accreditation
- Intuitive to use - we'll have your staff trained to use the system within one hour

Key features

- Online fleet management system designed for the complete management of 1 to 5,000+ vehicles, drivers, plant, machinery, documentation and policies
- Choice of system packages to suit your fleet size and make-up, including bespoke functionality to cars, LCVs and HGVs
- Approved under the DVSA Earned Recognition Scheme providing the KPI reporting required for adoption into their scheme
- Streamlined vehicle inspection process. The FORS FMS Mobile App enables drivers to submit safety checks and more, removing paper based processes, improving adoption and efficiency
- Easy data integration, with the ability to import a multitude of external data streams to create a truly comprehensive fleet overview
- Intelligent reporting and the ability to monitor every type of expenditure associated with your fleet, helping you achieve optimum cost control and a compliant fleet
